**The most beautiful form of orderliness inside and out**

### **VS ADD® Box: Vauth-Sagel is cleaning up!**

*Erkeln, 29/04/2021* – **Quality, high-value and orderliness - these are the basic parameters that best describe the VS ADD® Box. Vauth-Sagel's philosophy, which has been thoroughly considered, results in products that make interior and exterior living environments into new experiences with elegant details and convenient functions. The VS ADD® Box is the right place for life's many little things – anywhere in the home.**

“This approach is a completely new kind of thinking, because until now storage systems mostly remained behind closed doors. Orderliness is a big word, but it starts in small things,” says Claus Sagel, Managing Director of Vauth-Sagel. The design of the VS ADD® Box is of such high quality, both visually and in terms of materials, that for the first time, such a system can now be used not only inside the cabinet but also outside of it. This applies to all rooms of the home without exception - whether in the kitchen, bathroom, living room or bedroom - VS ADD® Box always fits. Take the bathroom, for example: hardly any room has such limited storage space and at the same time so many small utensils that need to be stored sensibly and within easy reach. The new organisational element creates orderliness for cosmetics & more. Even the smallest things are optimally stored on open shelves.

In this way, Vauth-Sagel demonstrates a philosophy of orderliness that is completely new for the industry: what works for inside also works for the outside! The VS ADD® Box is available in four different sizes as a steel or plastic version for individual applications. The respective lids and storage inserts complete the collection. It cuts a particularly fine figure on the VS ADD® Board shelf and the Planero® and Essentio storage versions.

#### **VAUTH-SAGEL:**

*Contemporary and innovative storage solutions. This is the essence of what Vauth-Sagel has stood for for more than 55 years. The owner-managed family company focuses on people's desire for the highest-possible level of comfort in all of its system components. The competence areas of development, production and sales are geared towards this - day after day. The core competencies in the kitchen and furniture industry have long since been transferred to modern living components. And that motivates the*
