**More comfort now even in the living room and bathroom**

### **Only one hand free? No problem with VS SUB® Comfort!**

*Erkeln, 29/04/2021* – The optimal use of space in cabinet systems of the different living areas is one of the core competencies of Vauth-Sagel. The multiple award-winning VS SUB® Comfort redefines this claim with an innovative detail: the unique system fitting allows the cabinet door to be opened and the shelves to be accessed directly at the same time with a single handle. Perfect, for example, for reaching utensils stored under cover even with a hair dryer in your hand. This provides more comfort in the bathroom - but this system is also a real everyday helper in all other areas of the home. The VS SUB® Comfort is well received by experts and consumers: After winning the Iconic Award in the Universal Design Competition, the Vauth-Sagel product has also won the Universal Design Expert Award and the Universal Design Consumer Award.

Kitchen and living are merging more and more. But while the design of the kitchen is becoming increasingly homely, it has so far hardly been possible to transfer know-how from the kitchen to the living room. Until now. Vauth-Sagel brings functionality and comfort from the kitchen into the living room. With the VS SUB® Comfort, everything is within reach. The innovative system fitting will impress with its purist frame made of filigree steel and is used for convenient access to the lower storage space of hinged-door wardrobes.

Two shelf pull-outs are automatically extended when the door is opened. The upper shelf can then be pushed in intuitively without any additional catches. This results in optimal access to the lowest level as well. When the doors are closed, the unit is automatically retracted again.

The shelves themselves are visually striking with their rounded sheet steel contour, which creates a soft impression and prevents collision with the front. The design perfectly complements the VS ADD® Box and VS ADD® Separator interior partitioning systems. For a personal touch, the floors can be individually fitted with the desired wood or décor. The raised rear wall of the shelves serves as anti-tipping and at the same time conceals an unwanted view into the guide systems. This means that VS SUB® Comfort is not only practical, but also meets the high Vauth-Sagel design standards.

### VAUTH-SAGEL:

*Contemporary and innovative storage solutions. This is the essence of what Vauth-Sagel has stood for for more than 55 years. The owner-managed family company focuses on people's desire for the highest-possible level of comfort in all of its system components. The competence areas of development, production and sales are geared towards this - day after day. The core competencies in the kitchen and furniture industry have long since been transferred to modern living components. And that motivates the more than 1,000 employees to produce more than 85 million products with the quality mark "Made in Germany" every year. In addition to many years of cross-material expertise, there are other features that ensure that Vauth-Sagel's global customers are that decisive step ahead: "Creating high-quality system solutions for living spaces. And doing that for everyone" - this promise is based on forward-looking impulses in product design and equipment. THAT is all Vauth-Sagel!*
