Over 1000 flexible possibilities

VS Gate sets new standards in storage utilisation!

Birmingham, March 3, 2024. **With the expansion of its VS TAL® Gate module to include the VS Gate Rack and VS Gate Rack Plus, Vauth-Sagel has created over 1000 new possibilities to implement individual solutions inside the cabinet and beyond. Whether it's a wall-mounted, cabinet door, or cabinet wall shelving unit, this modular expansion makes everything possible all at once. This means customers can use the VS Gate Rack as both a cabinet door shelf and a wall shelf. What's more, when combined with the VS TAL® Gate, the VS Gate Rack Plus creates the ultimate solution: the VS TAL® Gate Pro.**

The VS Gate Rack and the VS Gate Rack Plus can be freely positioned regardless of the TAL® or SUB® category, and they are available in heights of H1, H3 and H5. Frames for door widths of C 450, 500 and 600 are also available to choose from. The door-mounted VS Gate products are already among the world's best systems currently in production. These modular tall cabinet solutions are opening up brand new horizons in every kitchen.

The modular system has been designed to provide maximum storage space and easy access, setting new standards in terms of both convenience and design. The significant advantage of VS Gate is its opening mechanism, which automatically pulls all of the stored items towards the user in one smooth motion for an optimal overview. What's more, this new design features invisible connections, avoiding unnecessary plastic parts.

With just a few elements, a whole host of application variations and cross-selling options are available within the design range. The VS TAL® Gate Frame, in the three widths of C 450, 500, and 600, offers the universal base and support structure for the VS TAL® Gate and the expanded level VS TAL® Gate Pro.

The shelf elements for rear and front mounting offer versatile combination possibilities. Depending on the positioning and dimensioning of the front frame of the VS TAL® Gate Pro variant, the use of the depth-reduced rear trays is possible, as well as the use of the classic full-depth Gate Trays in the lower area. The four new VS Gate Flex elements (Tray H0, Frame, Roll, Hook) complement the base shelf VS Gate Pro Front Tray for the widths of C 450–500 and C 600, providing versatile opportunities for excellent interior organisation.

The VS Gate Rack features a special profile that allows invisible locking of flexible shelf elements without additional plastic adapters to highlight its minimalist design. What's more, the 64 mm increments enable precise positioning of the shelf elements tailored to the storage space, and these can be easily adjusted without the need for tools. The VS Gate Rack will be available for order from early 2024.

VAUTH-SAGEL:

Contemporary, innovative storage solutions. This has been the core business of Vauth-Sagel for over 60 years. When it comes to all of its system components, the owner-operated family company focuses on people's desire for as much convenience as possible. The development, production and sales divisions are guided by this desire – every day. The company transferred its core expertise in the kitchen and furniture industry to modern living components long ago. And this motivates its 1,000 employees to manufacture over 85 million products with the “Made in Germany” quality hallmark every year. Alongside many years of expertise in a wide range of materials, other characteristics ensure that Vauth-Sagel customers worldwide are a decisive step ahead: “Creating high-quality system solutions for living spaces. For all people” – this promise is based on pioneering ideas for product design and features. This is Vauth-Sagel!
