Vauth-Sagel showcases design-driven storage innovation at KBB Birmingham 2026

Stand S70 highlights ESSENTIO design collection, VS ADD® Frame A and Ligano+ concept

Birmingham, 1 March 2026 – At KBB Birmingham 2026 (Stand S70), Vauth-Sagel presents a cohesive portfolio of storage solutions that position cabinet interiors as an integral part of kitchen design. Bringing together new product introductions, concept developments and proven systems, the company demonstrates how functionality, organisation and aesthetics can be seamlessly combined.

With more than six decades of experience since 1962, Vauth-Sagel continues to build on its reputation as a specialist in premium storage solutions. Engineered and manufactured in Germany, all products meet the highest quality standards and are backed by a 15-year warranty—reflecting the company's long-term commitment to durability, reliability and user-focused design.

Design-led highlights

At the centre of the presentation is **ESSENTIO**, Vauth-Sagel's latest tray design, bringing a clear, architectural aesthetic to cabinet interiors. With its refined, reduced design language, ESSENTIO enables kitchen interiors to become a deliberate part of the overall design concept. The system is available in the UK via trade partner Uform and supports flexible, user-oriented organisation in combination with the VS ADD® accessory system.

Another highlight on stand S70 is the **VS ADD® Frame A**, a versatile storage solution that combines organisation with visual presentation. Designed to accommodate bottles and glassware, it introduces a new level of openness and display within cabinetry and beyond, making it suitable for kitchens, living spaces and hospitality environments alike.

Also on show is **Ligano+**, a forward-looking concept that explores the combination of natural materials and modern system design. Featuring solid oak trays with dovetailed joints paired with refined fittings, Ligano+ responds to the growing demand for authenticity, tactility and material-driven design in kitchen interiors. The concept is presented to gather market feedback ahead of potential series development.

In addition to these design-led highlights, Vauth-Sagel showcases its extensive expertise in functional storage solutions across all key kitchen zones. This includes a comprehensive range of waste separation systems, offering solutions for a wide variety of cabinet sizes and requirements—from compact single applications to high-capacity systems—designed to support efficient workflows and sustainable kitchen organisation.

Further solutions on display

VS ENVI® Waste separation systems – Comprehensive range

Vauth-Sagel's extensive range of waste separation systems offers solutions for a wide variety of cabinet sizes and requirements – from compact single-bin configurations to high-capacity systems. Designed for flexibility and durability, they support efficient workflows and modern, sustainable kitchen planning.

VS ENVI® Water – Structured integration under the sink

With **VS ENVI® Water**, Vauth-Sagel provides a space-saving solution for integrating externally supplied water systems within the sink cabinet. A dedicated frame structure accommodates systems such as boiling or filtered water units, while a coordinated VS ENVI® Space waste separation system is integrated alongside.

VS WASH® – Integrated laundry management

VS WASH® introduces an integrated laundry solution concealed behind cabinet fronts. The system enables efficient sorting, storage and handling of laundry.

VS TOP® Down – Ergonomic access redefined

The VS TOP® Down drop-down fitting enhances accessibility in wall units by bringing stored items into an ergonomic reach zone. The system combines ease of use with a refined motion concept, improving both functionality and user experience in everyday **kitchen use**.

Modular pantry systems – Maximum flexibility

Vauth-Sagel also showcases its modular pantry solutions, including VS TAL® Gate and VS TAL® Gate Pro, presented as a double pantry application, as well as the base cabinet pull-out VS SUB® Larder and its supplementing VS Larder Flex modules. These systems demonstrate the company's expertise in modular design, enabling highly individualised storage configurations and efficient organisation across tall and base units.

Together, these solutions illustrate Vauth-Sagel's holistic approach: from individual components to complete systems, all elements are designed to work seamlessly together, enabling intuitive organisation, ergonomic access and a consistently high level of user comfort — reflecting the company's guiding principle, "comfort makes the difference".
